PROFESSIONAL SUMMARY

Results-driven Software Developer with 4 years of experience designing and building scalable web applications using Python, Django, React, and PostgreSQL. Proficient in RESTful API development, database management, and frontend development. Strong understanding of software development lifecycle, version control using Git and GitHub, and Agile methodologies. Passionate about writing clean, maintainable code and delivering high-quality software solutions.

EDUCATION

Bachelor of Science in Computer Science

University of Zambia, Department of Computing and Informatics | Graduated: 2020

Certificate in Full Stack Web Development

Coursera (Meta Professional Certificate) | Completed: 2021

Certificate in AWS Cloud Practitioner

Amazon Web Services | Completed: 2022

WORK EXPERIENCE

Software Developer — Zed Technology Solutions, Lusaka

March 2022 – Present (3 years experience)

- Designed and developed RESTful APIs using Django and Django REST Framework for client web applications
- Built responsive React.js frontend interfaces integrated with Django backend APIs
- Managed PostgreSQL databases including schema design, query optimization, and migrations
- Implemented user authentication systems using JWT tokens and Django authentication
- Collaborated with cross-functional teams using Agile methodology and two-week sprint cycles
- Maintained version control using Git and GitHub with regular code reviews
- Deployed applications on AWS EC2 instances and managed cloud infrastructure

Junior Software Developer — Copper Technologies Ltd, Lusaka

June 2020 – February 2022 (1 year 8 months experience)

- Developed and maintained Python scripts for data processing and automation tasks
- Assisted in building web applications using Django framework
- Wrote and optimized SQL queries for PostgreSQL databases
- Participated in code reviews and contributed to improving code quality
- Worked with NumPy and pandas for data analysis and reporting tasks

TECHNICAL SKILLS

Python	Django	Django REST Framework
React.js	JavaScript	HTML & CSS

PostgreSQL	SQL	Database Design
Git & GitHub	RESTful APIs	JWT Authentication
NumPy	scikit-learn	Data Analysis
AWS Cloud	Agile / Scrum	VS Code

KEY PROJECTS

HireSmart — Intelligent Resume Screening System

Built a full-stack web application using Django, React, and PostgreSQL that uses NLP techniques (TF-IDF and cosine similarity) to automatically screen and rank job applicants based on resume content.

ZedPay — Mobile Payment Integration Platform

Developed RESTful APIs using Django REST Framework to integrate mobile money payment gateways for a Zambian fintech startup, handling over 500 transactions per day.

School Management System

Designed and built a full school management web application using Django and PostgreSQL, including student records, attendance tracking, and grade management modules.
